Professional Summary

Senior DevOps Engineer with 4+ years of experience delivering secure, highly available cloud platforms and automation for production workloads. Strong expertise in AWS, Kubernetes (EKS, Helm, Karpenter), Terraform, Ansible, Docker, GitOps (ArgoCD), and GitLab CI/CD. Hands-on with Zero Trust networking using OpenZiti, private container registries (Harbor), and hardened image engineering using Packer and Kali Linux/Docker builds. Experienced in implementing enterprise IAM/SSO using Keycloak (OIDC/SAML) and building observability with Prometheus, Grafana, Loki, and CloudWatch to support 99.99% uptime. Passionate about IaC, automation, security-first DevOps, and operational excellence.

Technical Skills

- **Cloud Platforms:** AWS (EC2, EKS, ECS, RDS, VPC, IAM, Route53, Auto Scaling, ELB), Azure, GCP
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation, Packer
- **Containers & Orchestration:** Docker, Kubernetes (EKS, Helm, Karpenter, Ingress), ECS, Docker Compose
- **CI/CD & GitOps:** GitLab, Jenkins, GitHub Actions, AWS CodePipeline, CodeBuild, CodeDeploy, ArgoCD
- **Identity & Access:** Keycloak, OIDC, SAML, RBAC, IAM, KMS, NACLs
- **Networking & Security:** OpenZiti (Zero Trust Networking), TLS/Certificates, Secrets Management, Vulnerability Scanning
- **Container Registry:** Harbor (RBAC, image lifecycle management, vulnerability scanning)
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch, ELK Stack, OpenSearch, Loki, Alerting
- **Service Discovery / Mesh:** HashiCorp Consul, Istio, App Mesh
- **Scripting & Automation:** Bash, Shell, Python, YAML, Groovy
- **Databases:** MySQL, PostgreSQL, DynamoDB, Amazon RDS
- **Practices:** SRE fundamentals, High Availability, Disaster Recovery, Incident Management, Agile, Scrum

Professional Experience

Ksolves India Limited

February 2025 – Present

Senior DevOps Engineer

Pune, India

- Designed and operated secure, high-availability Apache NiFi clusters on Linux and Kubernetes for enterprise data pipelines.
- Implemented Zero Trust access using **OpenZiti** for service-to-service connectivity and remote administration without exposing public endpoints.
- Implemented enterprise SSO using **Keycloak** (OIDC/SAML), improving access control and standardizing authentication flows across services.
- Built hardened VM and container images using **Packer, Docker, and Kali Linux** for security testing, automation workloads, and standardized golden images.
- Developed **GitLab CI/CD pipelines** for automated bot runner image builds, security checks, version tagging, and artifact publishing.
- Deployed and managed **Harbor private container registry** with RBAC and vulnerability scanning for secure image distribution.
- Automated AWS infrastructure provisioning using Terraform and Ansible, improving repeatability and reducing manual effort.
- Orchestrated production workloads using Kubernetes, Helm, and GitOps with ArgoCD; implemented rollout/rollback practices.
- Implemented centralized observability using Prometheus, Grafana, Loki, and AWS CloudWatch to reduce MTTR and improve reliability.
- Mentored engineers and documented CI/CD, security, and platform standards to scale DevOps adoption across teams.

DemandFarm

August 2021 – January 2025

Product Solution Engineer (DevOps)

Pune, India

- Managed 1,000+ Linux and AWS EC2 instances, automating log ingestion and S3 archival (10TB+/month).
- Automated infrastructure and application deployments using CloudFormation, Terraform, and Ansible, reducing provisioning time by 60%.
- Implemented CI/CD pipelines using Jenkins, CodePipeline, and CodeDeploy, improving release stability and velocity.
- Migrated workloads across AWS, on-premises, and GCP environments while maintaining 99.99% uptime.
- Upgraded MySQL databases and Ubuntu systems, improving performance, patch compliance, and security posture.
- Enforced IAM, GuardDuty, Inspector, NACLs, and AWS Config for compliance and security governance.

CloudInfomatic Pvt Ltd

March 2021 – July 2021

Jr Salesforce Developer Intern

Bangalore, India

- Configured Salesforce automation workflows, validation rules, roles, and profiles.
- Implemented secure access controls using sharing rules and role hierarchies.

Projects

Secure Bot Runner Platform (OpenZiti + GitLab CI/CD + Harbor + Packer)

- Designed a Zero Trust bot execution platform using OpenZiti to eliminate public exposure and enable controlled access to internal services.
- Built GitLab CI/CD pipelines to automate Docker/Kali image builds, validation, versioning, and publishing into Harbor registry.
- Generated reusable VM images using Packer (qcow2/AMI-ready patterns) to standardize deployments across environments.
- Enabled secure artifact lifecycle with Harbor RBAC and vulnerability scanning for container images.

SSO Enablement for Platform Services (Keycloak + OIDC/SAML + Nginx)

- Implemented centralized authentication and authorization using Keycloak for platform services and internal tools.
- Configured OIDC/SAML integrations, role mapping, and secure reverse-proxy patterns to standardize access control.
- Hardened TLS/certificate workflows and documented onboarding steps for teams to adopt SSO consistently.

Production-Grade Kubernetes Platform on AWS EKS (Terraform + Helm + ArgoCD)

- Provisioned AWS EKS infrastructure using Terraform; deployed applications using Helm and GitOps with ArgoCD.
- Enabled autoscaling using Karpenter and implemented ingress patterns for secure traffic management.
- Implemented observability using Prometheus/Grafana/Loki and alerts to support reliable operations.

Achievements & Leadership

- Led MySQL and PostgreSQL migrations ensuring zero data loss and minimal downtime.
- Spearheaded Ubuntu 18 to 22 upgrades across production systems, reducing EOL security risks.
- Implemented enterprise SSO (Azure Entra ID / SAML) to strengthen authentication and access governance.
- Reduced manual operational workload by 80% through automation, standardization, and IaC adoption.

Training & Certifications

- AWS Certified DevOps Engineer – Professional
- AWS Certified Solutions Architect – Associate
- Red Hat Certified System Administrator (RHCSA)
- Red Hat Certified Specialist in Ansible Automation
- Certified Kubernetes Administrator (CKA) – In Progress
- HashiCorp Certified: Terraform Associate – In Progress

Education

Government College of Engineering, Aurangabad

2018 – 2021

Master of Computer Application (MCA)

Aurangabad, India

Savitribai Phule Pune University

2015 – 2018

Bachelor of Science in Computer Science

Pune, India
